Join us for this upcoming session on

Non-Alcoholic Fatty Liver Disease
Organized by: David Moore and Marion Sewer

Hepatic Lipid Signaling: NAFLD and Beyond
Sunday, April 3, 2016
9:45AM – 12:00PM

David Moore, Baylor Coll. of Med.
Nuclear receptors in hepatic dysfunction

Roger Davis, Univ. of Massachusetts
JNK signaling in hepatic disease

Hedgehog signaling in NAFLD

Genetic Determinants & Extrahepatic Complications
Monday, April 4, 2016
4:15PM – 6:00PM

Helen Hobbs, UT Southwestern Med. Ctr./HHMI
Genetics of fatty liver disease: Ancient mutations for a common disease

Jacob Friedman, Univ. Colorado, Denver
Developmental origins of NAFLD

Gerald Shulman, Yale Univ./HHMI
Mitochondrial protonophores for treatment of NAFLD/NASH and Type 2 diabetes

Additional talks selected from volunteered abstracts. Submit to ASBMB topics 2560-2574

Metabolic Insight into the Enzymatic Players
Tuesday, April 5, 2016
9:45AM – 12:00PM

Jay Horton, UT Southwestern Med. Ctr.
Fatty acid elongases in metabolic disease

Christopher Newgard, Duke Univ.
Branched chain amino acid metabolism in NAFLD

David Cohen, Harvard Univ.
Acyl-CoA Thioesterases (ACOTs): Metabolic control and pathogenic roles in NAFLD

Beyond the Bench: Maximizing Graduate/Postdoctoral Training for Non-Research STEM Careers
Wednesday, April 6, 2016
1:00PM – 2:30PM

David Wilson, SACNAS/Johns Hopkins Sch. of Med.
Science careers that don’t require a labcoat

Kenneth Gibbs, NCI
To Stay (at the bench) or go? Determinants of career decision-making in recent PhD graduates

Rick McGee, Northwestern Univ.
Finding your FIT among career options with a PhD
